Building together a sustainable, innovative and inclusive territory

Located in the middle of the golden triangle Provence, Côte d'Azur and Verdon, Dracénie - Pays de Fayence LAG encompasses a diversity of natural landscapes, from perched villages to wide hills. Its historical heritage is well preserved. The Provençal terroir moulds local know-how and gastronomy.

This quality of life favours tourism and population dynamics. Yet, economic activities, farming and services shall be diversified and adapted to match changing citizen expectations. Besides, climate change impacts and water shortage, among other major risks, weaken the territory.

Therefore, this is the very land «habitability» that is at stake. For the LAG, it means remaining welcoming, active, solidary, caring and aware of the needed transformations of the world.

Local Development Strategy

The LAG aims at diversifying and improving the access to economic activities, public services, culture and health care. The goal is to transform transportation modes and to encourage healthy eating by promoting local farming and gastronomy. The LAG shall ensure social cohesion and build on an ecological and resilience-driven approach.

LAG board

25 full members and as many alternate members

Public partnership **11 full members**

Private partnership **14 full members**

EAFRD budget

1.342.314 €

*Inter-municipal areas
for cooperation

Sustainable economic development

Supporting the emergence of economic sectors that are based on local riches while taking into account local and global resources growing scarcity

Economic opportunities and outlet studies ; development of local resource recovery and recycling processes ; know-how transfer, especially regarding traditional craftsmanship ; development of a new touristic offer relying on digital solutions

Local resilience and support to transition

Building local resilience through risk prevention actions and backing the energy and environmental transition

Vulnerabilities and risks diagnoses ; risk prevention and crisis management tools; actions in favour of biodiversity knowledge and restoration; tools in favour of recycling, re-use and circular economy

Adaptation and access to public services, culture and health care

Contributing to an easier and more balanced access to public, health and cultural services for the whole population, thus ensuring social and territorial cohesion

Studies assessing the population expectations and needs in relation to services; helping public services stakeholders to pool their means of actions; creation of itinerant health services; support to the development of training offers

Development of alternative means of transportation

Favouring the use of alternatives to solo driving mobility, that are more virtuous in relation to the environment

Soft and active mobility studies, actions and tools; communication actions and information, awareness-raising and training materials related to alternative mobility options; studies, actions and tools that promote «non-mobility»

Towards a new food system model

Putting forward a food model which enables people to eat healthily while reducing inequalities

Local farming enhancement, promotion and awareness-raising actions; healthy food education activities; food waste reduction actions; food waste recovery actions

Project promoter's path

1

Project form submission

2

Pitching the project for opportunity assessment

3

Grant application submission and review

4

Voting match-funding opportunities and programming the grant file

5

Carrying out the project

6

Payment request and project completion
